Subject Index

A-current, depolarizing prepotentials and, 153
Abuse potential, methamphetamine, 197
Acclimation
  cholinergic muscarinic receptors and, 620
  heat stroke and, 540
  HSP 70 and, 617
  prenatal and postnatal, 87
  prevention and, 531
  telemetry and, 233
Activity, Ang II and, 212
Adaptation, thermal, effects of, 9
Adenylyl cyclase
  age and, 111
  hibernation and, 709
Adrenergic signal transduction, euthermic and hibernating European hamsters and, 705
Adrenocorticotropic hormone (ACTH), antipyretic effect of, 344
Afferent spinal neuronal thermosensitivity, 139
Afterdrop
  afterrise and, 43
  core temperature, 664
Age
  advanced, 95
  alpha-adrenergic blockade and, 102
  heat tolerance and, 540
  vasconstriction threshold and, 789
Alfentanil, thermoregulatory effects of, 792
Alpha-adrenergic antagonists, humans and, 101
Alpha$_2$ adrenoceptor agonists and antagonists, cardiovascular mechanisms and, 512
Anesthesia
  general, heat balance in, 10
  intravenous, hypothermic response to, 818
  pediatric, warming devices in, 812
  peripheral-to-core heat transfer during, 831
  regional, thermoregulation during, 761
Angiotensin II
  chronic treatment with, 211
  IL-1-induced fever and, 314
Animal, extrapolation from, to human, 843
Anorexia, LPS-induced fever and, 253
Anteroventral third ventricle lesion, fever and, 420
Antidepressants, heat intolerance induced by, 553
Antioxidant, hyperthermia-induced neuronal NOS activity and, 587
Antipyretic effects of stress hormones, 410
Antipyretic substances, 262
Antipyretics, neuropeptides as, 344
D-Arginine, NO-synthase and, 167
L-Arginine, NO-synthase and, 167
Arterial blood pressure, α_1-adrenergic antagonists and, 512
Asthma, exercise-induced, 751
Autonomic excitation, peripheral response vs, 621
Autonomic nervous system, 534

B-lymphocytes, antibody formation by, 460
Baclofen, temperature sensitivity and, 148
Baroreceptor, low-pressure, 539
Bed rest, exercise thermoregulation with, 741
Behavioral thermoregulatory response, insult and, 839
Beta-adrenergic receptors, nonshivering thermogenesis and, 73
Beta$_3$-adrenergic receptor, age and, 112
Biogenic amines, research on, 6
Bioheat approach, 51
Biphasic alterations in cellular responses, 620
Blood flow
  brain, 540
  cerebral, 566
  control of, 54
  fat, 536
  forearm, 604
  gastrointestinal, 601
  laminar, 57
  muscle, 536, 600
  myocardium, 536, 601
  nasal mucosal, 614
  pancreas, 601
  respiratory tract, 600
  skin, 41, 536, 600
    negative pressure breathing and, 604
    sweating rate and, 591
  splanchnic, 536, 545
  spleen, 601
Blood pressure
  arterial, 535
  central venous, 535
  NECA and, 361
  telemetry and, 233
  temperature regulation and, 603

Blood-brain barrier
permeability of, 560
PGE_2 and, 294
Body fluid volume, need to rapidly restore, 542
Brain
COX-2 in, 302
cytokines and, 307
Brain cooling, selective, 28, 613
Brainstem, adrenergic signal transduction in, 705
Brown adipocytes
heat production of, in FOK rat, 649
NO donors and, 369
Brown adipose tissue
age and, 95
FOK rat and, 647
halothane inhibition of, 718
hyperthyroidism and, 712
studies at symposia on, 8

Calcium (Ca^{++}) influx, $[Na^+]_i$ and, 639
Call rate, duck embryo, 79
Calorimetry, exponential response and, 12
Capsaicin, peripheral neural inputs and, 427
Cardiac output
death from heat stroke and, 536
VO_2 and, 600
Cardiovascular mechanisms, α_2-adrenoceptor agonists and antagonists and, 512
Cardiovascular responses, heat stress and, 600
Catecholamines, urine and, 402
Cellular changes, heat stress and, 540
Central control of body temperature, 146
Cerebellar atrophy, antidepressants and, 554
Cerebellum, cGMP levels in, 818
Cerebral cortex, heat stress and, 568
Cerebral ischemia
heat stroke-induced, 572
protection against, 768
Cerebral lesions
acute, 722
chronic, 724
Cerebrospinal fluid (CSF), PGE_2 and, 291
CGP-12177, age and, 113
Chicken, broiler, posthatch, 628
Cholinergic muscarinic receptors, heat acclimation and heat stress differential effects on, 620
Circadian mechanisms, IL-1 and, 436
Circadian rhythm
endotoxin fevers and, 231
homeostasis and, 63
Clinical aspects, first emphasis on, 8
Clotting, disseminated intravascular coagulation (DIC) and, 542
Coagulative necrosis, 540
Coagulopathy, local hypothermia and, 768
Cold, chronic exposure to, 682
Cold defence, fever and, 491
Cold environment, exercise in, 752
Cold exposure, menstrual cycle and, 697
Cold load, severe head injury and, 729
Cold stress, cardiovascular mechanisms and, 514
Cold water near-drowning, 670
Cold-seeking behavior, LPS shock and, 736
Complement, sheep erythrocytes and, 461
Computational software, 230
Computer-mediated communication, 223
Conditioned response, 232
Confinement, exercise thermoregulation with, 741
Continuous hyperthermic peritoneal perfusion (CHPP), peritoneal damage after, 610
Convective heating system, surgery and, 807
Cooling
body/brain, mechanisms for, 670
cutaneous, peripheral-to-core heat transfer during, 828
Cooling body, artificial, 542
Cortex, COX-ir neurons in, 296
Corticosteroid, pretreatment with, 542
Cortisol, TNF-α and, 260
Cramps, heat, 534
Culture, primary, PGE_2 production and, 312
Cutaneous contribution, thermoregulatory control and, 778
Cyclic adenosine monophosphate (cAMP), hibernation and, 709
Cyclic guanosine monophosphate (cGMP), cerebellar, 818
N^6-Cyclohexyladenosine (CHA), antipyretic activity of, 353
Cyclooxygenase system, CNS and, 296
Cyclooxygenase-2 (COX-2)
brain vasculature and, 302
cytokines and, 307
5'-(*N*-Cyclopropyl)-carboxamidoadenosine (CPCA), pyrogen fever and, 353
Cytokines
acute phase response and, 245
endogenous opioid peptides and, 324
LPS vs, 307
OVLT and, 445
prophylactic or therapeutic manipulation of, 542

Cytolytic T-lymphocytes, differentiation of, 459

Day-night rhythm, LPS fever and, 508
Dead band, 45
Defensins, immunity and, 465
Dehydration, voluntary, 540
Dexamethasone, febrile responses of rabbits and, 330
5,7-Dihydroxytryptamine (5,7-DHT), lateral septum and, 188
1,3-Dipropyl-8-cyclopentylxanthine (DPCPX)
  A_1 activity blocked with, 360
  pyrogen fever and, 353
Diurnal alterations, hibernation and, 709
Drug metabolism, impaired, 773

E-mail discussions, 220
Ectotherm, nocturnal, 64
Edema
  brain, 562
  heat, 534
  perivascular, 586
Efficiency function, 53
Electroencephalogram (EEG), sleep and, 281
Endocrine secretions, submandibular glands and, 342
Endotherm, nocturnal, 64
Endothermy, embryonic, in precocial birds, 78
Endotoxin
  bacterial, obese Zucker rats and, 407
  fitness and, 545
  gastrointestinal, 539
  heat stress and, 539
Endotoxin shock
  biphasic fever and, 489
  heat stroke and, 536
  hypothermia and, 733
Energy balance, heat regulation and, 17
Entropy, Burton's steady state and, 22
Environment, early discussion of, 7
Environmental and thermal physiology, M. J. Fregly and, 2
Environmental enrichment, fever and, 398
Environmental heat load, 534
Epinephrine, human humoral thermogenesis and, 689
Error signal, regulatory system and, 27
Erythrocyte sphering, 540
Escherichia coli lipopolysaccharide (*E. coli* LPS), cardiovascular mechanisms and, 514
Estrogen, freely moving female rats and, 207
5′-*N*-Ethylcarboxamidoadenosine (NECA)
  antipyretic activity of, 353
  arterial blood pressure and, 361
Evans blue, blood-brain barrier permeability to, 565
Evaporative heat loss, FOK rat and, 644
Exercise
  asthma and, 751
  cardiovascular responses and, 600
  negative pressure breathing during, 604
  nitric oxide and, 591
  rewarming and, 667
  rodent toxicology studies and, 851
  warm environment and, 536
Exercise thermoregulation, 741
Exhaustion, heat, 534
Experimental models, humans and, 758
Exponential response, calorimetry and, 12

Febrile response, glucocorticoids and, 328
Female rats, freely moving, 207
Fetus, thermal balance in, 10
Fever
  acute phase response and, 244
  anteroventral third ventricle lesions suppressing, 420
  bacterial endotoxin and, 409
  biphasic, infection and, 485
  body cooling and, 491
  COX-2 and, 302
  day-night rhythm and, 508
  E. coli LPS-induced, 514
  endotoxin, circadian rhythm and, 231
  environmental enrichment and, 400
  Fos protein and, 480
  heat stress and, 539
  immune response and, 453
  initial discussions of, 7
  LPS-induced
    MIP-1β and, 274
    substance P and, 316
  microwave exposure and, 497
  newborn rat and, 478
  NO and oxygen radicals modulating, 373
  peripheral neural inputs and, 427
  PGE_2 and, 288
  prostaglandin-mediated sequelae of, 299
  pyrogen, CHA and CPCA and, 353
  pyrogenic signal and, 437
  sialadenectomy and, 338
  TNF-α receptor and, 264
Firing rate
  neuron, 167
  noradrenaline infusion effect on, 177

Fluorescence, sodium concentration and, 637
Fluoxetine (prozac), heat intolerance and, 555
Forced-air rewarming, simulated field conditions of, 678
Forskolin, age and, 113
Free energy, Burton's steady state and, 22
Fregly, Melvin James, tribute to, 1

GABA (gamma-aminobutyric acid), central or systemic application of, 146
$GABA_A$ and $GABA_B$ receptors, interaction of, 149
Gain, vasoconstriction and shivering, 760
Gender, alpha-adrenergic blockade and, 102
Genes, FOK rat and, 642
Glasgow Outcome Scale, severe head injury and, 729
Glucocorticoids
  endogenous, 328
  exogenous, 328
Golden hamster, environmental enrichment and, 398
Gradient, thermal, body temperature as, 455
Graetz number, 57
Guanosine 5'-diphosphate (GDP) binding, age and, 114
Guinea pig
  Kupffer cells in, 448
  OVLT of, 383

H-290/51, pretreatment with, 583
Halothane, brown adipose tissue and, 718
Hamster, euthermic and hibernating European, 705
Head injury, severe, 722
Heart rate
  heat tolerance and, 546
  telemetry and, 233
  toxic insult and, 849
Heat, external, sources of, 668
Heat alert program, 532
Heat and temperature, controversy about, 21
Heat balance, components of, 12
Heat conductance, calculated tissue, 743
Heat illness, avoidance and treatment of, 534
Heat load, severe head injury and, 730
Heat loss
  age and, 95
  evaporative, 88
  excessive, 764
Heat production
  age and, 95
  determination of, by measurement of O_2, 88
Heat regulation
  energy balance and, 17
  hydraulic analogy and, 19
  hypothesis of, 12
Heat resistance, FOK rat and, 640
Heat shock protein
  heat stress and, 617
  heat stroke-induced cerebral ischemia and, 575
  thermotolerance and, 628
Heat stress
  alert program for, 526
  cerebral blood flow and, 561
  cholinergic muscarinic receptors and, 620
  HSP 70 and, 617
  nitric oxide and, 581
  posthatch broiler chickens and, 628
Heat transfer
  blood vessels and, 56
  peripheral-to-core
    during anesthesia, 831
    during mild cutaneous cooling, 828
    during vigorous cutaneous cooling, 828
    postanesthetic, 832
  post-venule, 54
Helper T-cells, cytokine production by, 461
Heredity, FOK rat and, 640
Hibernation
  adrenergic signal transduction and, 705
  CNS opioids and 5-HT and, 195
Hippocampus
  COX-ir neurons in, 296
  NOS immunostaining in, 584
Histamine, irradiation and, 344
Homeostasis, circadian rhythmicity and, 63
Horse
  cardiovascular responses in, 600
  nitrix oxide inhibition of thermoregulation in, 591
Hot flush, climacteric, early focus on, 8
HTmL, 222
HTTP forms, 222
Human, extrapolation from experimental animal to, 843
Hydraulic analogy, heat regulation and, 19

5-Hydroxytryptamine (5-HT)
opioid-containing terminals in septal area and, 192
thermal challenges and, 187
Hyperpnea, brain cooling and, 614
Hypertension
cold-induced, characteristics of, 686
mineralocorticoid-induced, 682
Hypertension research, M. J. Fregly and, 2
Hyperthermia
avoidance and treatment of, 534
brain injury and, 559
endotoxin shock-associated, 733
intracellular sodium concentrations and, 637
intraperitoneal heating (IPH)-induced, 548
malignant, protection against, 768
methamphetamine and, 202
PGE_2 production and, 311
prepontine knife cut and, 127
radiation-induced, 344
stress-induced, anteroventral third ventricle lesions and, 420
vascularization and, 51
Hypervolemia, training-induced, 606
Hypohydration, cardiac output and, 540
Hypometabolism, homeotherms and, 71
Hypotension, systemic arterial, 575
Hypothalamic neurons, scrotal skin temperature and, 184
Hypothalamic-pituitary-adrenal axis, obese Zucker rats and, 411
Hypothalamus
cellular properties determining neuronal thermosensitivity and, 133
postnatal acclimation and, 88
Hypothermia
anesthetic-induced, 818
forced-air rewarming and, 676
hyperthermia-induced, 548
malarial infection and, 392
opioid-induced, serotonergic system and, 192
prevention of, during surgery, 807
radiation doses and, 344
redistribution, 763
severe, human model for, 669
Hypothermic response, inhalation toxicology studies and, 849
Hypoxia, cerebral, 540

Immersion deconditioning, exercise thermoregulation with, 741
Immune activation, acute phase, 292
Immunity, defensins in, 465
In vivo and *in vitro*, spinal neuronal thermosensitivity, 139
Indomethacin
heat tolerance and, 539
prostaglandin synthesis blocked by, 545
TNF-α activity and, 265
Inducible nitric oxide synthase (iNOS), MIP-1β and, 277
Infection, adaptation to, 485, 737
Inflammation
prostaglandin-mediated sequelae of, 299
systemic, 246
adaptive response and, 737
Infrared tympanic thermometers, evaluation of, 225
Infusion, warm, surgery and, 807
Inhalation, cold and warm air, 751
Inhalation toxicology, hypothermic response in, 849
Input resistance, thermal changes in neurons and, 134
Insults, thermoregulatory response to, 835
Interactive research, 217
Interleukin-1 (IL-1)
CSF levels of PGE_2 and, 293
heat stroke-induced cerebral ischemia and, 574
immunity and, 465
sleep and, 282
thymocytes and, 456
Interleukin-1β (IL-1β), febrile responses of rabbits and, 331
Interleukin-2 (IL-2), temperature dependence of, 462
Interleukin 6 (IL-6), psychological stress and, 413
International directory of thermophysiologists, Thermophysiology WWW Server including, 218
Internet chat, 221
Intolerance, heat, antidepressants and, 553
Intracerebroventricular administration, ACTH, 345
Isoflurane
sevoflurane vs, 786
thermoregulatory effects of, 780
Isoprenaline, human humoral thermogenesis and, 690

Kappa-receptor agonist dynorphin A_{1-17}, 159
Kappa-receptor antagonist nor-BNI, 163
Ketamine, NO synthase and, 818
Ketanserin, malarial infection and, 392

Knockout/transgenic animal models, FOK rat different from, 642
Kupffer cells, PGE_2 and, 448

Laminae I + II and X
  warm sensitive neurons of, 143
  NO-synthase and, 166
Lateral septum
  ground squirrel, 193
  rat, 187
Laterality, selective brain cooling and, 124
Lipopolysaccharide (LPS)
  bacterial, lethal effects of, 255
  biphasic increase in body temperature induced by, 290
  day-night rhythm and, 508
  defensins action and, 470
  developing rat and, 474
  E. coli, cardiovascular mechanisms and, 514
  gastrointestinal wall barrier to movement of, 539
  indomethacin and, 268
  Kupffer cells and, 448
  NADPH-diaphorase staining and, 383
  PGE_2 production and, 311
  prophylactic or therapeutic manipulation of, 542
Lipoprotein lipase, NO donors and, 369
Lithium, heat intolerance and, 555
Lower body negative pressure (LBNP), 539
Lower midbrain, procaine and, 130
Lymphocyte activating factor (LAF), peritoneal macrophage collection and release of, 466

Macrophage, pyrogenic/inflammatory cytokines and, 461
Macrophage inflammatory protein-1 (MIP-1), PGE- or LPS-induced fever and, 272
Macrophage inflammatory protein-1β (MIP-1β), 273
Magnesium sulfate, postanesthetic shivering and, 799
Majordomo, 220
Malaria, ketanserin and, 392
Mean body temperature, minute stimulus and, 29
Mecca Body Cooling Unit, 542
Mechanisms, physiological, of thermoregulation, 34
Membranal changes, chronic heat and, 622
Membrane potential, neuronal sensitivity and, 133
Menstrual cycle, set-point and, 204
Meperidine
  forced-air rewarming and, 676
  magnesium sulfate vs, 802
  thermoregulatory effects of, 794
Metabotropic excitatory amino-acid receptor agonists and antagonists, 184
Methamphetamine, central and peripheral nervous systems and, 197
N-Methyl-D-aspartate (NMDA), general anesthetics and, 818
Mice, TNF-α receptor in, 264
Microcatheter, PGE_2 and, 289
Microspheres, radioactive, 600
Microvascular permeability, heat stress and, 588
Microwave exposure, febrile monkeys and, 497
Midazolam, thermoregulatory effects of, 781
Molecular changes, heat stress and, 540
Monkey, squirrel, microwave exposure and, 497
Monoamines, heat stroke-induced cerebral ischemia and, 572
N^G-Monomethyl-D-arginine (D-NMMA), NO-synthase and, 167
N^G-Monomethyl-L-arginine (L-NMMA), NO-synthase and, 167
Mu-opioid agonist PL-017, 159
Mu-opioid receptor antagonist CTOP, 159
Muscovy duck, 78
Myocardial ischemia, hypothermia and, 768

Nadolol, psychological stress and, 414
NADPH-diaphorase staining, LPS and, 383
Naloxone, heat stress and, 563
Naltrexone, heat-stress and, 564
Nare dilatation, exercise and, 614
Negative feedback, heat production and, 24
Negative pressure breathing, 605
Neural toxicity, methamphetamine, 197
Neuron, guardian, 81
Neuronal COX-2 mRNA, fever and, 304
Neuronal damage, heat stroke-induced, 572
Neuropeptides, thermoregulation and, 344
Neurotensin, hyperthermia and, 344
Nitric oxide (NO)
  exercise and, 591
  fever modulated by, 373
  heat stress and, 582
  intravenous anesthetics and, 818

Nitric oxide (NO) donor, cultured brown adipocytes and, 369
Nitric oxide (NO)-synthase, spinal thermosensitive neurons and, 166
Nitric oxide (NO)-synthase activity, OVLT and, 383
Nitric oxide (NO)-synthase inhibition, ketamine and pentobarbital and, 818
Nitrous oxide/sevoflurane anesthesia, age and, 789
Nonmetalic substitutes for stainless steel cannula, 498
Noradrenaline
  hyperthermia induced by, 512
  skin thermoreceptors and, 176
Norepinephrine
  halothane inhibition and, 719
  human humoral thermogenesis and, 689
Null zone, 45
Nycthemeral periodicity, 212

Occupational heat exposure, 529
On-line conferencing, 223
On-line education, 224
Opioid receptor, blockade of, 567
Opioids
  cold-acclimated rats and, 702
  cytokines and, 324
  pathogenesis of shock and, 548
  rat hypothalamic neurons and, 156
Oral contraceptives, cold exposure and, 697
Organum vasculosum laminae terminalis (OVLT)
  cytokines and, 445
  different age rats and, 481
  lesions affecting, 420
  NO synthase activity in, 383
Oxygen consumption, (VO_2)
  cardiac output and, 600
  duck embryo and, 81
  estrogen and, 208–209
Oxygen radicals, fever modulated by, 373
Ozone, rodents and, 851

Pain, prostaglandin-mediated sequelae of, 299
Particulate matter, rodent toxicology studies and, 851
Pediatric anesthesia, warming devices in, 812
Pentobarbital, NO synthase and, 818
Periaqueductal grey matter, vasomotor control and, 120
Peripheral response, autonomic excitation vs, 621
Peritoneal damage, CHPP and, 610
Phaclofen, temperature sensitivity and, 148
Pharmacology of thermoregulation, 5
Phentolamine
  low dose and high dose, 102
  skin cold receptors and, 177
Photoperiod, rodent and, 73
Physical fitness, indomethacin and, 539
Physical performance, breathing cold and warm air and, 751
Physiological problems of thermoregulation, 32
Physiology, World Wide Web and, 216
Pigeon, LPS fever in, 508
Poikilothermia
  homeothermia vs, 737
  human, pathophysiology and clinical implications of, 738
Poly I:C, fever and, 492
Ponderostat, controversy about, 21
Positive feedforward, heat loss and, 24
Prenatal period, ontogeny of thermoregulation during, 78
